

# Gaucher Disease Symptom Checklist

To be used in discussion with your doctor

## Possible Symptoms of Gaucher Disease

There are three types of Gaucher disease. Symptoms can begin at any age, and can be mild, moderate, or severe. Gaucher disease is progressive, meaning that symptoms will get worse over time and can also affect major organs in your body, such as your liver, lungs, bones, and spleen.

### Type 1

#### Onset in childhood or adulthood

- Delayed growth in children
- Weakness
- Tiredness and fatigue
- Easy bruising or bleeding
- Bone or joint pain
- Bones breaking without reason (fractures)

### Type 2

#### Onset in infancy

- Early onset brain damage
- Poor development
- Seizures
- Spasticity (jerking movements)
- Poor ability to suck and swallow
- Enlarged spleen and liver

### Type 3

#### Onset in childhood

- Skeletal problems
- Eye movement disorders
- Cognitive problems
- Poor coordination
- Respiratory problems
- Blood disorders
